When it comes to Hedge Fund IT
You need a partner
who understands your business

- Alternative Investment Industry Focus
- Combined Client Base AUM \$415BB
- Blue Chip Client List
- Prime Brokerage Relationships
- Investor Community Recognition
- Front, Middle, Back Office Expertise

IHVDR™ is a sub-product of the InfoHedge Hosted Platform™ that delivers an optimal DR/BCP solution with an easier to swallow price tag. By virtualizing a service typically delivered through expensive physical hardware, InfoHedge is able to provide it's IHVDR clients with more for less. Using our private cloud InfoHedge eliminates the need for clients to purchase any DR hardware. Instead, clients receive real-time replication of all business critical platforms in their private, virtual environment. Service is delivered over the wire from SAS 70 Type II facilities on a flat fee subscription basis. InfoHedge is a Single Custody Provider and does not outsource any of the product features, all systems are owned, designed, and operated by InfoHedge.
