

InfoHedge Hosted Platform™ Fully Compliant With New Massachusetts Standards for Protection of Personal Information and Data Security

Advanced IT Solution Integrates Compliance, Disaster Recovery, Market Data Connectivity and Application Hosting

NEW YORK, February 23, 2010 – InfoHedge Technologies, a leading provider of the alternative investment technology, today announced that the InfoHedge Hosted Platform™ is fully compliant with the new Massachusetts Data Privacy Law (also known as MA 201 CMR 17). This statute requires any firm with the personal data, such as social security numbers, driver's license numbers and financial information of at least one Massachusetts domiciled individual to abide by Massachusetts guidelines for data security.

Features of the InfoHedge Hosted Platform that demonstrate compliance with the law include the ability to remotely wipe all approved devices (mobile phones, laptops), two factor RSA authentication for all remote access, email encryption capability, and best practice password policies. InfoHedge also satisfies requirements relating to third party data custody by providing all of its infrastructure services directly, without outsourcing any element of its offering. Included with each subscription InfoHedge provides relevant security and data protection information in its due diligence response document.

Alexander Kouperman, President of InfoHedge Technologies stated: "We invite alternative investment firms that are seeking to demonstrate strong adherence to regulations and compliance best practices to consider the value and capabilities offered by the InfoHedge Hosted Platform™."

About InfoHedge Hosted Platform™

The InfoHedge Hosted Platform™ delivers a robust and scalable technological infrastructure that adheres to the highest standards of security, reliability and usability. Delivered as an ASP service, the InfoHedge Hosted Platform™ offers a cost-effective alternative to traditional in-house solutions, with features that include application hosting, e-mail, compliance, disaster recovery, files and backup, mobile messaging, remote access, market data, phone systems and 24/7 support. The platform is architected with embedded Disaster Recovery and Messaging Compliance, and provides all of its subscribers with an enterprise grade infrastructure typically only available to top tier financial institutions.
